Requested for the subsidisation

The justification for the subsidization

Why do you not have any other funding source?

- (i) I did not have job-related income
- (ii) The planned research budget for my Ph.D. is very low and I still looking/applying for additional source of finance in other to achieve my research objectives.

Why can't your institution pay for it?

- (iii) The Interfaculty Center for Training and Research in Environment for Sustainable Development at University of Abomey Calavi, Benin doesn't provide funding to attend any research activities or training. The center's own activities depend on grant.
- (iv) Moreover, the Federal University of Technology, Akure, Department of Meteorology under which I am doing the Ph.D. study did not have funding for International student participation for summer school, conferences or trainings.

The requested level of subsidy

- (v) Travel Subsidy.

A tentative cost estimate (for travel subsidy).

- (vi) £ 866 (Economy: Cotonou, Benin - London Heathrow Airport)
