

## ***Hsin-Chien Liang Motivational Letter***

Due to our group major to develop Earth System Model (TaiESM) and High Resolution Model (HiRAM-SIT and FV3GFS-Taiwan). It is necessary to use HPC to simulation. Therefore, I would like to join this summer school to learn how to improve the Global Model performance effectively. Besides, I need to analysis and data process in CMIP6 data. In this summer school we can learn how to deal with big data and tools.
