

Letter of justification for the subsidisation

Dear organizers, I am very glad to apply for Summer School on Effective HPC for Climate and Weather. Currently I am young postdoc researcher at Institute of Oceanography and Fisheries.

Reason for which I am applying for subsidy is that I am a young scientist who does not have the resources to finance my own coming to a school that I think could have a huge impact on my future research work. Although we are the youngest member of the European Union, we are still a developing country so science does not get much support.

I am requesting Travel Subsidy that includes full registration fee and travel cost. Tentative cost estimate for travel subsidy will not exceed an amount greater than £ 500. Two-way airline ticket can be purchased for a £ 350 (maybe I can buy cheaper one, but it depends on timing), and travel cost from London to Reading will not exceed £ 100.

Sincerely,

Tomislav Džoić
