The Organizer,
University of Reading,
UK.

Dear Sir,

APPLICATION FOR TRAVEL SUBSIDY

I hereby solicit for the Travel Subsidy (including Full package Registration and travel cost) in the forth coming Summer School on Effective HPC for Climate and Weather in your institution.

I have worked on evaluation of convective storms on my master's thesis title; 'Sensitivity of Five Cumulus Schemes in Simulating West African Mesoscale Convective Systems Characteristics' using Weather Research and Forecasting (WRF) model. During this master program I went through hell before I completed the program due to Electricity challenge and no knowledge of Cluster. I am waiting for my PhD admission to further my career development on Numerical Modelling and the use of High computing system will be highly needed in the program. I don't want to depend on my Organization for support due to political interest bias and internal issues.

The tentative cost estimate (for travel subsidy) is £1900 (Economy Flight Travel cost- £1100 and Full Package Registration- £800).

Thanks, in anticipation of your favorable response.

Yours faithfully,

ALABI, BENJAMIN OLUWASOLA
