

Justification for the requested level of subsidy

I am working in department of Environmental Science, University of Kashmir, Srinagar, J&K, India, which is located in the western Himalayan Region. My University does not provide any funds for overseas training/workshop programs. These programmes are very helpful for overall understanding and capacity building in this part of land which is a conflict zone. However, due to very few opportunities for any research grant and very low level of economic development, it is very difficult to provide funding for attending such type of programs.

Dr. Arshid Jehangir
Assistant Professor
Department of Environmental Science,
University of Kashmir
