

Application for subsidy

I would like to apply for a subsidy for the Summer School on Effective HPC for Climate and Weather. The project which I will be working on (Producing EnerGy and preventing hAZards from SURface water Storage in Peru) is a collaboration between a considerable number of researchers from both the UK and Peru. As such, it is important to keep individual costs down, and the grant is not able to pay for all training of researchers.

Ideally, I would like to request full subsidy including travel. However it may be possible to pay for my travel from the grant, so please also consider me for an attendance subsidy. I anticipate that my travel costs for return train travel from Leeds to Reading will cost approximately £100.
