

Matthew Griffith – Application for subsidisation

My name is Matthew Griffith and I am a final year PhD student at the University of Bath. My PhD research is focused around the extension of the Met Office's Unified Model to the Mesosphere and Lower Thermosphere. I would like to apply for the attendance subsidy, as the limited funding from my institution is able to cover my travel arrangements.

I am coming to the end of my PhD and therefore have limited funding available for further research activities. However, this is an important time of my PhD, as I look to be exposed to researchers in my field in order to gain contacts and think about possibilities for future collaboration.

Given my limited funding, and the importance of this final year of my PhD, I am therefore applying for subsidisation.
