

Dear Sir / Madam,

I'm writing this letter, to express my utmost interest in joining your group of participants at Reading University Summer School, by attending the course titled "Effective HPC for Climate and Weather".

I have been part of University of Tirana for eight years now, working as a lecturer as well as conducting research for my doctoral studies in the field of Geographic Information Systems and Augmented Reality. For me, these past eight years have been extremely demanding yet at the same time highly rewarding and a true pleasure. I have gained a great deal of experience and been steeped in academia, lastly and most importantly I have been well-positioned to conduct research in the aforementioned fields. Personally, I have a deep passion for all aspects of computer science and it has always been my goal to devote my professional career towards understanding them.

Therefore I would consider it an excellent opportunity and of great interest to be part of your summer event, given that I am currently pursuing my Ph.D. Although in my years I have gained excellent experience, both from hands-on in the topics of my interest and from direct leading experts in the subjects, I still consider this opportunity invaluable to me and my future endeavors.

Furthermore, I firmly believe that your course is based on similar techniques that we utilize at my current position. I believe that it will greatly fine-tune and enhance my professional skills, in addition to furthering my personal development.

During my studies, I have been introduced and trained in a variety of subjects including programming, data structure, a complex algorithm and web engineering in addition to my most preferred subjects. Additionally, I have also studied Geographic Information System and Augmented Reality.

Finally, I am proficient with a variety of software and have extensive experience with applications of IT in the environment. Thus, I firmly believe that I will be able to smoothly transition and cope with the requirements of your program.

The experience that I could gain in a foreign country would be invaluable for both my personal and professional development. I am highly enthusiastic about the pursuit of this new challenge and would like to express my gratitude for your consideration and look forward to hearing from you in the near future.

Sincerely,

Ana Dhembi
