Application for the subsidy request for ESiWACE Summer School on Effective HPC for Climate and Weather, 2020

I hereby apply for the participation and subsidy request for ESiWACE Summer School on Effective HPC for Climate and Weather, 2020. I am convinced that this summer school will provide a great platform to improve my computational skills. I am very keen to participate in Academic Group Projects Session and investigating deep learning approach to classify hail and heavy precipitation signal. I am requesting subsidies to attend the summer school, as no special funds available in our institute for a training programme. Present I am working in hail mitigation operational project and under current project rules no funds available for training or summer school. I am requesting subsidies for full package registration and travel support. Travel cost estimated around 500 Euro.

I am therefore grateful for your consideration of my application, and I would highly welcome the opportunity to participate in ESiWACE Summer School. I look forward to hearing from you.

Sincerely,

Satyanarayana Tani
